Service Spotlight

Security Services

About 30 percent of data breaches are caused by repeat offenders from within the organization. It highlights a continued problem: Risk accumulates over time when proper education and reporting do not happen. Find out how affordable KnowBe4 is for your organization and be pleasantly surprised.

Threats of the Year
A look back at the tactics and tools of 2019

2019

In our end of year threat report we look at the most significant cyber threats of 2019, including DNS Hijacking and targeted ransomware. We also explore the go-to tools that cyber criminals are using for capturing data and evading detection, from remote access Trojans to hiding threats in encrypted traffic.

"Success does not consist in never making mistakes but in never making the same one a second time."
--George Bernard Shaw

In The News

Ransomware Attacks Grow, Crippling Cities and Businesses

Hackers are locking people out of their networks and demanding big payments to get back in. New data shows just how common and damaging the attacks have become.

Shutting Down Doesn't Actually Shut Down Windows 10

You would think clicking the Shut Down button on your PC Start Menu would Shut Down your PC. That is not the case with Windows 10. It actually goes into hibernation mode which is what makes it faster to boot up. If you're experiencing issues with your PC you'll need to hit the restart button instead. Restarting your PC will fully Shut Down before coming back up again.
